

VISION PLANS VS MEDICAL PLANS

Two types of health insurance contribute to your eye health services and products: (1) your vision savings plan and (2) your medical insurance. Your vision savings plan covers routine wellness exams and includes the purchases of glasses and contact lenses. Your medical insurance covers the diagnosis and management of medical eye diseases, including cataracts, glaucoma, macular degeneration, dry eye disease, etc.

VISION SAVINGS PLAN

- Vision Savings Plans cover routine wellness exams, including checking for new glasses (refraction)
- Vision Savings Plans include the purchase of eyewear and contact lenses

MEDICAL INSURANCE

Medical Insurance Plans cover diagnosis and management of

- Diabetes
- Cataracts
- Glaucoma

WHAT DOES THAT MEAN WHEN IT COMES TO BILLING

As a result, it may be necessary for us to bill some services to your vision savings plan and some services to your medical insurance, as required by these insurance companies. We will minimize your 'out-of-pocket' expenses as much as possible. Some charges for our services and products may not be paid by either of these insurances, including deductibles, copayments and non-covered fees. Per your insurance plan contracts, these charges become your responsibility.

Please provide our staff with both your vision plan authorization card and your medical insurance card. We are happy to discuss fees and help you understand the difference between medical and vision plans.

I understand the above information and authorize the Coastal Jersey Eye Center to file my claim based on the reason for my visit and the results of the examination.
